Napster User Busted in RIAA Crackdown

A nineteen-year-old Oklahoma State University student may face felony charges of copyright violation after police found approximately 1,000 music files on his computer. This marks the first time the Recording Industry Association of America (RIAA) has targeted an individual user of Napster and other downloading services.

Barenaked Ladies Battle Napster with `Trojan' Downloads

Many Napster users will be surprised if they attempt to download new songs from the Barenaked Ladies: the popular Canadian band has flooded the net with imposter files to confuse online music users who might think they are accessing free songs. Instead the users will hear this message: "Although you thought you were downloading our new single, what you actually were downloading is an advertisement for our new album," says singer Steven Page. One clip ends with a quip from drummer Tyler Stewart: "The next thing you know we'll be supplying your natural resources." Napster representatives had no comment.

Trade Group Sues 13 for Software Piracy

A software trade group that conducted an online anti-piracy sting sued 13 Americans this past November, alleging they sold bootleg software worth tens of thousands of dollars on Internet auction sites. The Business Software Alliance, which represents software companies like Microsoft, Macromedia and Adobe Systems, conducted the worldwide sting operation to ward

off pirates and educate consumers.
